

<b>Soggetto coordinatore</b>	Selex sistemi integrati Partners Serit del progetto: Finmeccanica, Selex Elsag
<b>Titolo del progetto</b>	Global AtM security MAnagement
<b>Acronimo</b>	GAMMA
<b>Descrizione del progetto</b>	<p>The GAMMA project stems from the recognition that while the SESAR initiative is effectively addressing some security issues in the new global ATM scenarios, there is a need to extend this scope to ensure a comprehensive assessment of the full set of security threats and vulnerabilities affecting ATM, considered as a system of systems and covering operational as well as technological aspects. In addition, there is a clear need, not completely met by SESAR, to establish and implement a comprehensive framework for managing ATM security once SESAR deployment is engaged to minimise the effects of ATM crises brought about by security incidents.</p> <p>The GAMMA vision is to adopt a holistic approach for assessing ATM security , elaborating a security framework at European level.</p>
